

Model FX3.0 Micro 1/4" to 3" Tube Squaring Machine

AC Version

- Delivers high quality weld end preparations on all types of material and piping configurations.
- Accurate, burr free weld preparation is achieved with minimal effort due to the newly designed micrometer feed system allowing controlled, smooth, and constant feed rates.
- Interchangeable collets provide clamping and prepping ranges from 1/4" to 3" O.D. tube.
- Short gripping length collets allow excellent clamping clearance for remachining most micro fittings.
- Both AC and DC models are available.
- Use portably or mount for high volume production.
- Unique quick locking system assures that each machined part is quickly and accurately held in place.

Cordless DC Version with Bench Mount
